

Tech Reports (11/13) - Hanson

1 - The Tech committee put forward our Goals and Objectives for this academic year. We sent it out for perusal last month but we'd also like to get some input from faculty members not on the committee. If you can, have a look and pass along your ideas to your division member, myself, or anyone else on the Faculty Business Committee. We'll be discussing it at faculty business either this next meeting or next.

Quick note, your ideas, no matter how fabulous they are may not make it on this year's calendar because of time constraints but we would put those in the pot for next year.

2 - BP/AP 3720 Computer & Network Use

We've just begun discussing this BP and AP in the Tech Committee and will continue to do so at our future Friday meetings. If you get a chance, have a read through both and please give your input to either your division rep, myself, or Eric Houck. We're still only in the discussion stage so there is time to read and give input.
