Curriculum Submission Deadlines, 2026-2027 Academic Year

April 6, 2026 Deadline

All course or program additions and modifications

The dates above represent the deadlines for courses to be included in the 2027-2028 catalog. Courses seeking articulation may be effective for the 2028-2029 catalog. Please note that courses must first be included in the catalog in order to be offered, and the 2027-2028 catalog covers fall 2027, spring 2028 and summer 2028 semesters.

Program Documentation: Before submitting a new program or updating an existing program, you must include necessary documentation. All programs require an updated program narrative. CTE degrees and certificates must also be accompanied by advisory committee meeting minutes as well as labor market information which can be requested here: Request LMI. The program will not go through technical review or workflow until it has all the necessary documentation. Please contact the Curriculum Analyst or Faculty Co-Chair if you have questions about necessary documentation needed for your program.

New programs must be sent to the New Program Taskforce for review. This process will happen while your program goes through the review process in CourseLeaf.

Archived programs on file with the Chancellor's Office will be sent to the Program Archival Taskforce. This process will happen while your program goes through the review process in CourseLeaf. (Please see Curriculum Handbook Chapter 4 for more details.)
