## SECTION A - Course Data Elements

### Send Workflow to Initiator

No

### CB04 Credit Status

Credit - Non-degree Applicable

### Discipline

Minimum Qualifications	And/Or
Mathematics (Master's Degree)	

### Subject Code

MATH - Mathematics

### Course Number

88

### Department

Mathematics (MATH)

### Division

Mathematics (MATH)

### Full Course Title

Support for Calculus I

### Short Title

Support for Calculus I

### CB03 TOP Code

1702.00 - Mathematics Skills

### CB08 Basic Skills Status

NBS - Not Basic Skills

### CB09 SAM Code

E - Non-Occupational

### Rationale

This course will help students who are almost ready to succeed in Calculus I, but for whom the just-in-time remediation will provide foundation for that success. This course complies with AB1705 and the chancellor's office directives.

## SECTION B - Course Description

### Catalog Course Description

Math 88, Support for Calculus I, is open only to students concurrently enrolled in Math 120, Calculus I. Concepts will be covered using a just-in-time approach for understanding of the corresponding concepts as they are presented in Math 120. Within this support

course, students engage in a comprehensive review of algebraic and trigonometric concepts crucial for achieving success in Calculus I.

## SECTION C - Conditions on Enrollment

### Open Entry/Open Exit

No

### Repeatability

Not Repeatable

### Grading Options

Pass/No Pass Only

### Allow Audit

Yes

## Requisites

### Corequisite(s)

Concurrent enrollment in Math-120 or equivalent.

## Requisite Justification

### Requisite Description

Course Not in a Sequence

### Subject

Math

### Course #

120

### Level of Scrutiny

Requisite Established by Statute/Regulation

### Explanation

Established by the Ed Code 78213(k)(1) in association with AB1705 legislature.

---

## SECTION D - Course Standards

### Is this course variable unit?

No

### Units

2.00000

### Lecture Hours

18.00

### Lab Hours

54.00

### Outside of Class Hours

36

### Total Contact Hours

72

### Total Student Hours

108

## Distance Education Approval

Is this course offered through Distance Education?

Yes

### Online Delivery Methods

DE Modalities	Permanent or Emergency Only?
Entirely Online	Permanent
Hybrid	Permanent
Online with Proctored Exams	Permanent

## SECTION E - Course Content

### Student Learning Outcomes

Upon satisfactory completion of the course, students will be able to:	
1.	Graph functions
2.	Solve equations
3.	Simplify expressions

### Course Objectives

Upon satisfactory completion of the course, students will be able to:	
1.	Solve linear, polynomial, rational, absolute value, radical, exponential, and logarithmic equations.
2.	Analyze and investigate properties of functions.
3.	Graph the elementary functions, examine their basic properties, and apply transformations to the graphs of functions.
4.	Solve linear, nonlinear, and absolute value inequalities.
5.	Perform basic operations on functions.
6.	Recognize the relationship between functions and their inverses graphically and algebraically and find inverse functions.
7.	Apply functions and other algebraic techniques to model real world Science, Engineering and/or Mathematical applications.
8.	Use formulas to find sums of finite and infinite series.
9.	Evaluate the trigonometric function of an angle in degree and radian measure.
10.	Solve trigonometric equations.
11.	Graph the basic trigonometric functions and apply changes in period, phase, and amplitude to generate new graphs.
12.	Evaluate and graph inverse trigonometric functions.
13.	Prove trigonometric identities.
14.	Study for a math class effectively.

### Course Content

Using a just-in-time approach, the following content will be covered as required for success in the co-requisite Support for Calculus I course.

1. Functions including linear, polynomial, rational, radical, exponential, absolute value, logarithmic: definitions, evaluation, domain, and range.
2. Inverses of functions.
3. Algebra of functions.
4. Graphs of functions including asymptotic behavior, intercepts, and vertices.
5. Transformations of quadratic, absolute value, radical, rational, logarithmic, and exponential functions.
6. Equations including rational, linear, polynomial, radical exponential, absolute value and logarithmic.
7. Linear, nonlinear, and absolute value inequalities.
8. Characterization of the zeros of polynomials.
9. Sequences and series.
10. Introduction to limit notation and continuity via polynomial and rational functions.
11. Rectangular coordinates, angles, and circular/radian measure.
12. Definitions of the six trigonometric functions.

13. Simplification of trigonometric expressions.
14. Proofs of trigonometric identities.
15. Graphs of trigonometric functions: period, amplitude, phase shift, and asymptotes.
16. Inverse trigonometric functions and their graphs.
17. Trigonometric equations.
18. Study skills / affective domain (this should be integrated into the class, not taught as a separate section)
  - a. Growth mindset and grit.
  - b. How to study for a math class.
  - c. Test taking strategies.
  - d. Campus resources.

## Methods of Instruction

### Methods of Instruction

Types	Examples of learning activities
Lecture	In class lecture
Discussion	Discussion of class topics
Other	Practice problems

### Instructor-Initiated Online Contact Types

Announcements/Bulletin Boards  
 Discussion Boards  
 E-mail Communication  
 Video or Teleconferencing

### Student-Initiated Online Contact Types

Discussions  
 Group Work

### Course design is accessible

Yes

## Methods of Evaluation

### Methods of Evaluation

Types	Examples of classroom assessments
Exams/Tests	<p>Traditional exams including a final exam.</p> <p>Exams could include methods of differentiation (differentiation rules, chain rule, implicit differentiation, and logarithmic differentiation).</p> <p>Use implicit differentiation to find <math>dy/dx</math> for <math>\sin(xy)=y</math>. 2. Find the derivative.  <math>y=\tan(x^2+4e^{2x})</math>.</p> <p>Exams could include solving applications of derivatives (such as derivative as a rate of change, optimization, and related rates).</p> <p>A box with a square base and open top must have a volume of 13,500 cm<sup>3</sup>. Find the dimensions of the box (in cm) that minimize the amount of material used.</p>
Quizzes	Quizzes on class material
Homework	Homework problems from book.
Projects	Individual or group projects.
Lab Activities	In face-to-face classes, it is recommended that one hour a week in the Math Success Center be assigned as a homework assignment worth 3 - 5% of the semester grade.

Other

Additional assessment information:

The Mathematics Department maintains a commitment to diverse teaching methods in courses emphasizing vital quantitative skills and qualitative reasoning ability. To that end, it is expected that sufficient formative assessments will be given to students that in frequency, length and rigor adequately assess both quantitative skills and qualitative reasoning.

## Assignments

### Reading Assignments

Example 1) Read the section on the Properties of the Trigonometric Functions.

Example 2) Read the section on Transformation of Functions. Be ready to discuss and work on graphing activities in class.

### Writing Assignments

Example 1) Online or Paper Homework: Complete assigned exercises from the applicable section in the text.

Example 2) Group Activity: Given a rational equation, find domain, range, asymptotes, if any, the maximum and/or minimum value, and graph by hand.

### Other Assignments

Other assignments as needed.

## SECTION F - Textbooks and Instructional Materials

### Material Type

Textbook

### Author

Stewart, J.

### Title

Calculus: Early Transcendentals

### Edition/Version

9th

### Publisher

Cengage Learning

### Year

2022

### ISBN #

9780357466278

**Reviewer Comments**

**Katherine Rhyno (krhyno) (Wed, 20 Sep 2023 20:49:57 GMT):** Please take a look at the requisite justification listed. If math-120 is listed as a co-requisite, then it is not a course in sequence. For the SLOs, they must be specific enough to be measurable and so you may want to model them from the objectives of the co-requisite course.
